## **DETAILED ACTION**

### ***Election/Restrictions***

Upon further examination, the Examiner notes that the applicant was not fully responsive to the election restriction received on April 13, 2007. There was no election of species made between the screw assembly, crosspiece and support structure from the action mailed on March 27, 2007. The only election that was made was of apparatus claims 1-36 and 40-44.

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 40-44 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The applicant is claiming "a receiver positioned at the proximal end of the anchor and fixed in position relative to the anchor" which appears to be new matter.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 40-44 are rejected under 35 U.S.C. 102(b) as being anticipated by Lee et al. (U.S. Publication No. 2002/0007183).

Lee et al. discloses a medical device support structure comprising a screw anchor (3) having a distal end and a proximal end, a receiver (15) positioned at the proximal end of the anchor and fixed in position relative to the anchor and a locking means consisting of a setscrew. Wherein the anchor is configured for attachment to a bone, wherein the receiver includes an opening configured for attachment to a medical device (5, 7) and wherein the locking means is configured to lock the medical device to the support structure after the support structure has been deployed. The receiver has a plurality of openings configured for attachment to a plurality of medical devices.

***Allowable Subject Matter***

Claims 1, 2 and 4-36 allowed.

***Response to Arguments***

Applicant's arguments with respect to claims 40-44 have been considered but are moot in view of the new ground(s) of rejection.

### ***Conclusion***

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
